UI DIRECTION PACK v1

Institutional Web3 Intelligence Terminal

Visual reference for WORK Sites and frontend handoff

Brand direction + representative screens + responsive/admin/Web3 patterns

Brand Manual

Dark Green System

Evidence-first

Reown/AppKit

Responsive

Admin

Prepared 25 Aug 2026 - visual direction only; textual UI specification remains the functional contract.

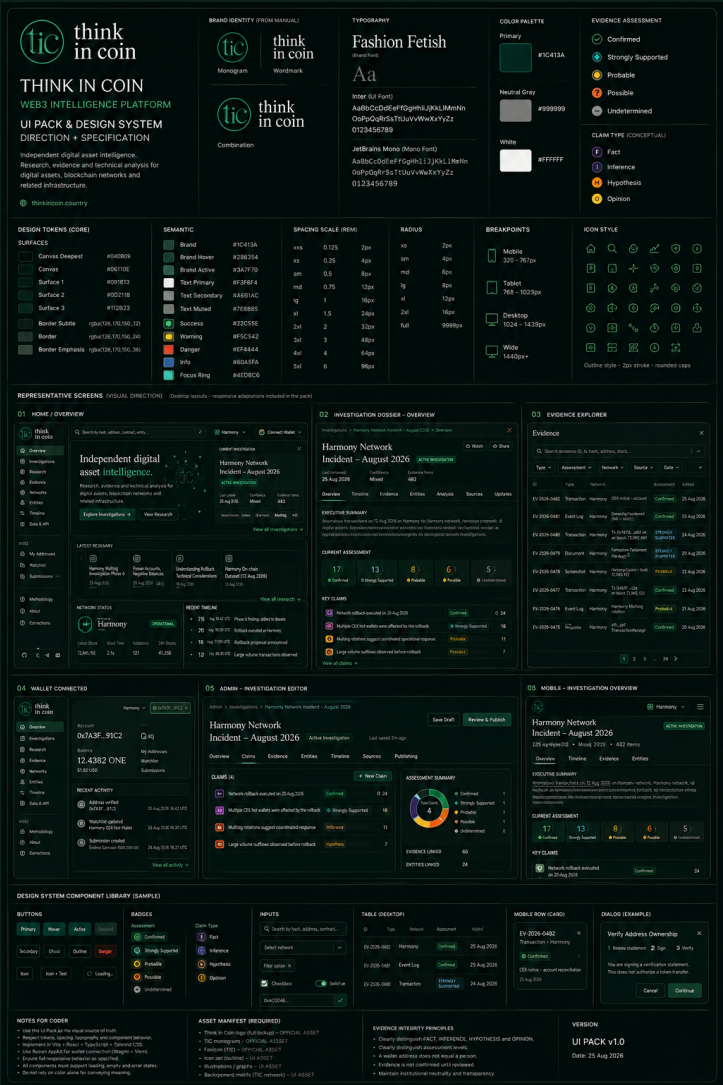

01 - Brand source of truth

Official visual identity should override generated approximations.

02 - Digital design system direction

Palette, typography, evidence semantics, breakpoints and representative UI patterns.

Desktop application shell, research dashboard, network status, evidence and Reown entry point.

ACTIVE INVESTIGATION

Last revised: 25 Aug 2026 | Confidence: Mixed | Evidence items: 482

Overview | Timeline | Evidence | Entities | Analysis | Sources | Updates

EXECUTIVE SUMMARY

Anomalous transaction on 12 Aug 2026 on Harmony da Harmony network, resulting in a network-wide digital asset, disrupted the network's consensus mechanism, causing a temporary loss of network functionality. The incident was resolved through a network-wide rollback, restoring network functionality.

CURRENT ASSESSMENT

Confirmed	Doubtfully Supported	Probable	Possible	Undetermined
17	13	8	6	5

KEY CLAIMS

Claim	Assessment	Count
Network rollback executed on 20 Aug 2026	Confirmed	24
Multiple CEX hot wallets were affected by the rollback	Doubtfully Supported	18
Multiple outliers suggest coordinated operational response	Probable	11
Large volume outflows observed before rollback	Possible	7

06 - Wallet / Account

Reown/AppKit-connected state: wallet is a functional layer, not a gate for public research.

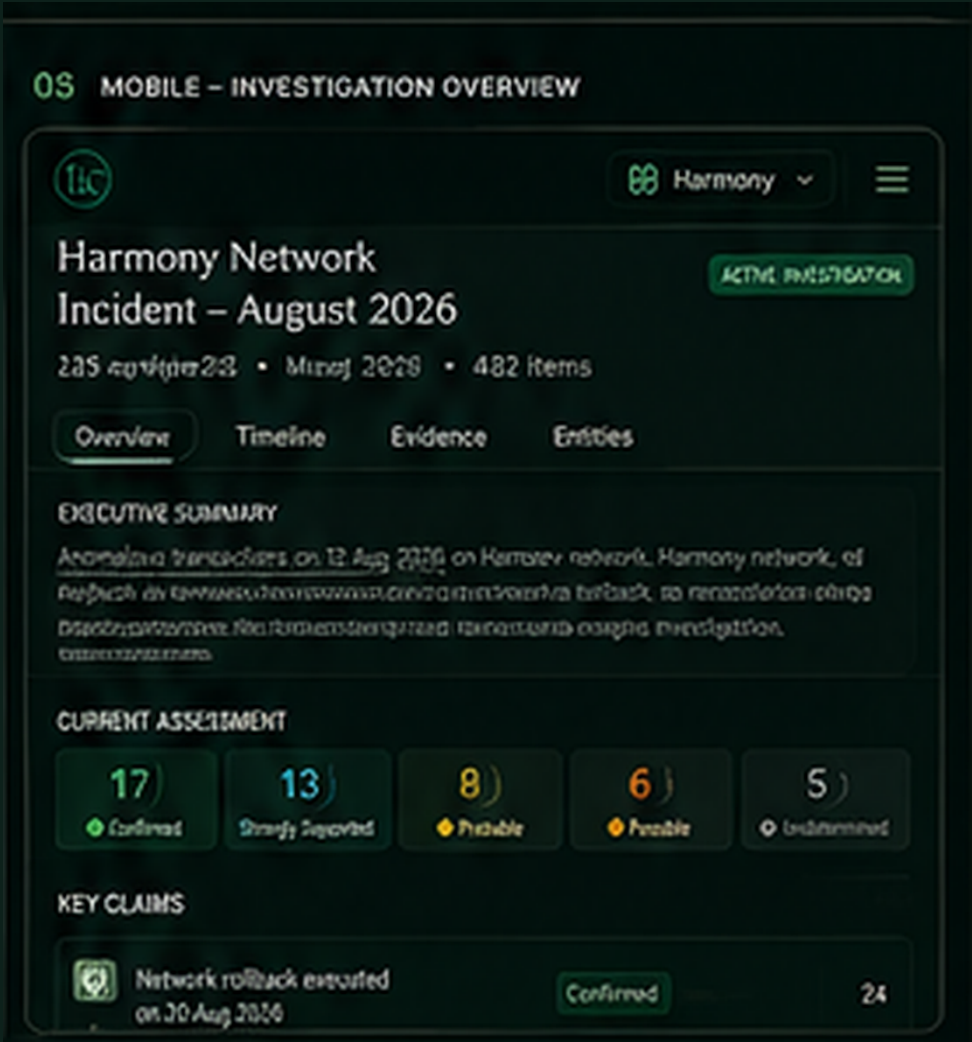

07 - Admin Investigation Editor

Research operations surface: claims, evidence links, assessment review and publishing controls.

08 - Mobile Investigation

Mobile-specific hierarchy: compact brand/header, route tabs, assessment cards and evidence-first content.

09 - WORK Sites handoff rules

Use this PDF as visual direction; use the separate textual request as the complete product/UI contract.

PRESERVE

- Official Think in Coin logo and brand rules
- Dark green institutional canvas
- Dense but readable information hierarchy
- Claim type separated from assessment level
- Restrained Web3/wallet treatment
- Public / account / admin shells

EXPAND

- Complete component library and tokens
- All pages and subpages in the UI request
- Desktop, tablet and mobile behavior
- Loading, empty, error and wallet states
- Admin review/editor workflows
- Implementation-ready component naming

AVOID

- Exchange/trading visual language
- Generic blue-purple crypto gradients
- Excessive neon/glow/glassmorphism
- Wallet connection as content paywall
- Color-only evidence classifications
- Invented criminal attribution in mock data

Recommended input bundle for WORK Sites

1) This PDF + 2) Brand identity PDF + 3) Complete textual UI Pack production request

The generated screen imagery is directional. Official logo/font assets and the textual specification remain authoritative.
